Career Objective

Results-driven Computer Science undergraduate with a strong foundation in software development, data structures, machine learning, and modern web technologies. Experienced in designing and deploying AI-powered and full-stack applications through academic and personal projects. Passionate about building scalable, production-ready software that solves real-world problems.

Education

Kalinga Institute of Industrial Technology, Bhubaneswar <i>B.Tech in Computer Science and Engineering</i>	2022 – 2026 CGPA: 7.99
Himalayan Whitehouse International College, Kathmandu, Nepal <i>Science (National Examination Board)</i>	2020 – 2022 CGPA: 3.06
Kalaiya Bright Land English Boarding School, Bara, Nepal <i>Secondary Education Examination(SEE)</i>	2008 – 2020 CGPA: 3.9

Coursework / Skills

- **Programming Languages:** Python, Java, C/C++, SQL, JavaScript, TypeScript
- **Web Development:** HTML, CSS, React.js, Next.js, Streamlit
- **AI/ML & Computer Vision:** Scikit-learn, Pandas, NumPy, OpenCV, YOLOv8, DeepSORT
- **Databases & Tools:** PostgreSQL, MySQL, Supabase, Git, GitHub, VS Code, Vercel
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Software Engineering

Projects

1. Diabetes Prediction Dashboard [↗](#) March 2025

Python, Streamlit, Scikit-learn, Pandas, Plotly, Joblib, GitHub

- Developed and deployed a diabetes prediction dashboard using Random Forest and Streamlit.
- Implemented manual prediction, batch CSV prediction, confidence scoring, and prediction history.
- Built interactive Plotly visualizations and deployed the application on Streamlit Cloud.

2. CareerForge AI – AI-Powered Career Development Application [↗](#) Apr 2026

Next.js, React, TypeScript, Supabase, PostgreSQL, OpenAI API, Tailwind CSS, Vercel

- Developed an AI-powered career development platform using Next.js, TypeScript, and Supabase.
- Integrated AI features including ATS resume analysis, interview preparation, and career guidance.
- Built a responsive full-stack application with PostgreSQL, authentication, and Vercel deployment.

3. Real-Time Football Match Analytics System Oct 2025

Python, YOLOv8, DeepSORT, OpenCV, Streamlit

- Developed a real-time football analytics system using YOLOv8, DeepSORT, and OpenCV for tracking.
- Implemented AI-based event detection to identify passes, shots, and possession changes from match videos.
- Generated real-time tactical insights through spatial-temporal analysis and automated match statistics.

Certifications & Achievements

- **Complete Web Development Bootcamp – Udemy** Aug 2025
- **Data Science – IBM (Coursera)** Sep 2025
- **Tools for Data Science – IBM (Coursera)** Oct 2025
- **Data Analysis with Python – IBM (Coursera)** Oct 2025
